

School Board

Morley Senior High School is a vibrant community dedicated to embracing diversity, celebrating achievement, and fostering a culture of belonging. Our values of Care, Collaboration, Commitment, Courage, Curiosity and Celebration underpin our vision.

These values are brought to life through the work of our dedicated School Board, which includes parents, community members, students and teachers, all working together to provide a high-quality learning environment.

The Board plays a significant role in supporting public education by guiding our school's direction through strategic planning and community partnerships. With staff, they collaboratively establish long-term goals by developing and reviewing school objectives, priorities, and policies, evaluating performance, and promoting our school within the community. Members play an important role in positively promoting the school in the community and contributing to school governance so that resources are used efficiently and that the priorities reflect the needs of our students.

Together, we're driving innovation, supporting student success, and fostering a strong sense of belonging. Join us in creating a positive and inclusive learning environment where everyone feels valued and supported.
